

## Curriculum Mapping

The tables below show how Urban Studies courses (both requirements and electives) meet program learning goals. The tables are organized according to the structure of the curriculum, including (1) *preparation for the major*, (2) *core courses* (theory, methods and high impact learning), and (3) *specializations* (Urban Cultures and Societies; Urban Planning, Design and Management; Urban Political Economy and Public Policy; and Urban Sustainability).

### Preparation for the major

At this level, most learning outcomes are introduced, with variations from course to course.

Courses	Program Learning Outcomes (see list)										
	1	2	3	4	5	6	7	8	9	10	11

### Core Courses

In our core courses, students continue to be introduced to new concepts and tools, but are also expected to demonstrate certain learning outcomes, with variations across courses. Most Methods courses emphasize data collection, description of urban processes, and methods. High Impact Learning courses are particularly important to master problem solving skills, civic engagement, and social responsibility.
